

PUBLIC FINANCE

Course code	FIN104
Course title	Public Finance
Type of course	Main
Stage of study	Undergraduate
Department in charge	Undergraduate school
Year of study	4rd
ECTS	6; 24 hours of lectures and 24 seminars, 112 hours of individual work, 2 hours of consultations
Coordinating lecturer	Dr. Aras Zirgulis
Studies form	Full-time classes
Prerequisites	-
Language of instruction	English

Course description

This course is a one-semester introduction to Public finance. Public finance is the branch of economics that focuses on the role of government in the economy. In this course we will study the role and the size of public sector, including the rationale for public sector existence (public goods, market failures) and government interventions (taxation policy, income redistribution).

Students will become acquainted the theoretical foundations of how the government affects the economy, in addition to being exposed to a variety of empirical research. Students will gain experience in critical thinking and will learn about the theoretic basis of the economic arguments used by politicians.

Aims of the course

This course aims to introduce to students the main concepts of Public finance: the role of the state in the economy, public goods and market failures, policy of taxation and income redistribution. Attention is also given to fiscal policy issues.

Subject learning outcomes	Study methods	Assessment methods
SLO1. Analyze the concepts of public goods	Lectures, seminars, individual	Midterm test, final exam
and market failures and their cures	study, self-study in groups	
SLO2. Apply various socio-economic models	Lectures, seminars, solving	Midterm test, final exam
to the evaluation of the public policy questions	exercises, self-study in groups	
SLO3. Discuss the reasons for government	Lectures, seminars, self-study in	Midterm test, final exam
intervention in the economy as well as	groups

10	Lecture #10 Corporate Taxation	2	2	Ch. 24
11	Lecture #11 Tax Reform and Consumption Taxation	2	2	Ch. 25
12	Lecture #12 Tax Competition and Fiscal Federalism	2	2	Ch. 10
	Total:	24	24	

Assessment methods

ТҮРЕ	TOTAL HOURS	EVALUATION, %	
Debate Presentation	30	20	
Participation		10	
Mid-term exam	30	30	
Final Exam	52	40	
Consultations	2		
Total:	114	100	

Debate Presentations

For the presentation topics each week I will assign a policy question. The two groups may think of themselves as lobbyists trying to argue for or against the policy. During your presentation you will present arguments for your position, which you must support with evidence and/or theory. This will be a competition, and the group which does a more convincing job will always get a higher score. After your opponents have done their presentations, it would make sense for you to ask them hard questions, as this will help you. Presentations will last approx. 10 minutes. If you go longer than 12 minutes you will be stopped.

In addition, each group will present me with a one page summary of their arguments, including their evidence and references. (look up "executive summary" as a guide). The work may be split up so that some members of the group work on the summary and some do the presentation.

End-semester individual written final exam

The exam counts towards 40% of the final grade. It is a closed-book test which includes multiple choice questions and open questions. It tests conceptual, analytical, and numerical skills. The exam will be based on all topics after the midterm.

In case of a negative final grade, students are allowed a re-sit exam. It will cover all course material. The weight of a resit is **70%**. Coursework cannot be rewritten but its evaluation (if positive) is not annulled.

Teaching methods

The course is taught in English and is structured as a combination of lectures, in-class activities, case studies, and student debate presentations. It requires a substantial amount of preparation by the students and active involvement during class.

Required Reading

1. Gruber, Jonathan. Public finance and Public Policy. Macmillan, 2016.
