

## CUSTOMER VALUE ANALYTICS

<b>Course Code</b>	<i>GRAV031</i>
<b>Course Title</b>	Customer Value Analytics
<b>Type of Course</b>	<b>Compulsory</b>
<b>Level of Course</b>	<b>Graduate</b>
<b>Department in Charge</b>	<b>Graduate School</b>
<b>Year of Study</b>	<b>1<sup>st</sup></b>
<b>Semester</b>	<b>2<sup>nd</sup></b>
<b>Number of Credits</b>	<i>6 ECTS; 36 hours of class work, 124 hours of self-study, 2 hours of consultations (group or online form)</i>
<b>Lecturers</b>	<p>- <b>CLASSES 1 and 2: Kristina Maikštėnienė</b>, BSc &amp; MSc (Applied Mathematics), MA (Financial Economics), MBA (Marketing and Strategy).</p> <p>- <b>CLASSES 3 to 9: Gedas Kučinskas</b>, BA (Applied Mathematics), MM (Business Management), PhD Candidate.</p>
<b>Form of Studies</b>	<i>Nine consecutive sessions (evening)</i>
<b>Prerequisites</b>	<i>Preferred: Marketing Management; Marketing Research</i>
<b>Teaching Language</b>	<i>English</i>

## GOAL OF THE COURSE

Customer Value Analytics is about turning customer data into insights, into decisions, into business value. Overall, the course is designed to provide students with a foundation on how to measure and manage customer value to increase profitable growth - and how to raise company's customer value accountability to a higher level.

The relevance of any marketing organization depends on its ability to systematically manage customer value, and the best marketers aspire to make this happen. From a leadership vantage point, there's a lot riding on marketing's ability to make a shift from product orientation to market and customer value orientation, because reactive and purely tactical marketing doesn't exercise much impact.

This course covers some of the key ideas for customer value analysis and analytics. The approach taken throughout the course hinges on three questions:

- 1) What are the outcomes that the business needs to achieve to meet its goals?
- 2) What does senior management expect marketing to contribute towards these outcomes?
- 3) How will senior management know that marketing has made contribution?

## LEARNING OUTCOMES OF THE COURSE

Upon completion of this course, successful students will:

<b>Course learning outcomes (CLO)</b>	<b>Study methods</b>	<b>Assessment methods</b>
CLO1. Understand the importance of customer value analytics and how it can help improve the measurement and management of marketing performance.	Assigned reading and lectures	Participation in class discussion
CLO2. Understand how to use and apply key customer value analytics concepts.	Assigned reading and lectures	Quizzes, class participation and application assignments.
CLO3. Learn to apply customer value analytics to a	Illustrative case	Participation and Company

company and present customer value analytics and metrics in a management report, or in a form of a dashboard.	studies, lectures and group assignment	small group assignment.
CLO4. Understand the barriers to successful implementation of customer value analytics as well as the potential for improved performance and profitability	Illustrative case studies, lectures and group assignment	Participation in class discussion.

### QUALITY ASSURANCE MEASURES

The lecturers will apply multiple teaching methods to keep the students engaged in the topic. Continuous student feedback will be invited and accommodated to improve class experience. Students are encouraged to e-mail the lecturer between the respective classes for any assistance or clarification needed (Gedas Kučinskas: [016297@stud.ism.lt](mailto:016297@stud.ism.lt), Kristina Maikštėnienė: [krimai@ism.lt](mailto:krimai@ism.lt)).

### CHEATING PREVENTION

Course will apply zero tolerance policy towards plagiarism, following the rules of the University.

### COURSE CONTENT

CLASS	TOPIC	CLASS HOURS	LECTURER	ASSIGNMENTS <sup>1</sup> (due before each class unless noted otherwise; Case preparation is ALWAYS your first priority before each class!)
1 (3/27) (Wed.)	<b>Introduction to Customer Value Analytics.</b> + Course project requirements.  <b>Slide Deck<sup>2</sup>:</b> Introduction to Customer Value Analytics.	4	Kristina Maikštėnienė	<b>No advance reading required before the first class. After this class, please read:</b> <ul style="list-style-type: none"> <li>Almquist, E. et al (2016). „The Elements of Value“.</li> <li>Almquist, E. et al (2018). „The B2B Elements of Value“.</li> </ul>
2 (3/28) (Thu.)	<b>Quantifying Customer Value in Networked Economy.</b>  <b>Slide Deck:</b> Quantifying Customer Value in Networked Economy.	4	Kristina Maikštėnienė	<b>Before this class, please read:</b> <ul style="list-style-type: none"> <li>Baker, W.L. et al (2010). „Customer Value“.</li> <li>CASE: „Cork'd: Building a Social Network for Wine Lovers“.</li> </ul>
3 (4/01) (Mon.)	<b>Market segmentation analysis: segment identification, targeting and positioning.</b>  <b>Slide Deck:</b> Market Segmentation Analysis	4	Gedas Kučinskas	<b>Before this class, please read:</b> <ul style="list-style-type: none"> <li>CASE: „IKEA Invades America“.</li> <li>WARC Best Practice (2018). What we know about segmentation.</li> <li>ESOMAR, Asia Pacific, (2013). Lost in Translation: How Western (mis)conceptions of Asian markets impact market research.</li> </ul>

<sup>1</sup> Because the course deals with rather dynamic knowledge domain, certain proportion of the lecture and discussion material for the course may be replaced and/or delivered "just-in-time" (uploaded to e-learning or indicated for downloading from the Internet). Students should be committed to follow e-learning system and observe uploaded course material on a daily basis.

<sup>2</sup> Students can download slides from e-learning system after each corresponding lecture (in pdf format).

4 (4/11) (Wed.)	<b>Competitive Analytics &amp; Business Strategy: competitive analysis and action, business strategy - scenarios, decision models and metrics.</b>  <b>Slide Deck:</b> Competitive Analytics and Business.	4	Gedas Kučinskas	<b><u>Before this class, please read:</u></b> <ul style="list-style-type: none"> <li>• WARC Trends (2018). Marketer's Toolkit 2019: Strategy, tech and media for the year ahead.</li> <li>• Jon Derome, Megan Lau and Robert Graves, ESOMAR (2018). Market Research – Connecting Data and Driving Lifetime Value.</li> </ul>
5 (4/12) (Thu.)	<b>Product or Service analytics: application of conjoint, decision trees, attribute testing.</b>  <b>Slide deck:</b> Product or Service analytics	4	Gedas Kučinskas	<b><u>Before this class, please read:</u></b> <ul style="list-style-type: none"> <li>• Lynn Hunsaker (2018). Marketing's role in customer value growth.</li> <li>• WARC Best Practice (2018). What we know about New Product Development (NPD).</li> </ul>
6 (4/16) (Mon.)	<b>Price, Distribution and Promotion analytics. Promotion strategies and metrics.</b>  <b>Slide deck:</b> Price, distribution, promotion.	4	Gedas Kučinskas	<b><u>Before this class, please read:</u></b> <ul style="list-style-type: none"> <li>• WARC Best Practice (2018). What we know about pricing strategies</li> <li>• WARC Best Practice (2018). What we know about private label brands</li> <li>• Nagle and Hogan (2011). Chapter 2. Economic Value Calculation.</li> </ul>
7 (4/23) (Mon.)	<b>Sales value analytics: consumer sales process, sales metrics, profitability metrics.</b>  <b>Slide deck:</b> Sales value analytics	4	Gedas Kučinskas	<b><u>Before this class, please read:</u></b> <ul style="list-style-type: none"> <li>• WARC Best Practice (2019). How can I predict the business impact of my marketing activity?</li> <li>• WARC Best Practice (2019). What we know about low-budget marketing.</li> </ul>
8 (4/25) (Wed.)	<b>Analytics in action: dashboards, data, best cases.</b>  <b>Slide deck:</b> Dashboard and tricks, Slide deck: Analytics in action.	4	Gedas Kučinskas	<b><u>Before this class, please read:</u></b> <ul style="list-style-type: none"> <li>• Frank van den Driest, Steven Berkhout and Meghna Jain (2017). How to build an insight-led organization.</li> <li>• ESOMAR (1999). The Evolution of Marketing.</li> </ul>
9 (4/26) (Thu.)	<b>Class Presentations of Team Project "Improving Customer Value Analytics Capabilities in Company X"</b>	4	Gedas Kučinskas	<b><u>Before this class, please:</u></b> <ul style="list-style-type: none"> <li>• Turn in 1-page Executive Summary (you will be given few more days to submit your interview transcripts).</li> <li>• Prepare team project PPT presentation (to be presented in class)</li> <li>• Be prepared to thoroughly discuss your project.</li> </ul>

## ASSESSMENT METHODS

TASK	SELF-STUDY HOURS	GRADE WEIGHT
(1) In-class tests (covering Classes 1 to 7, administered at the beginning of Classes 2 to 8, respectively)	42	56
(2) Team Project "Improving Customer Value Analytics Capabilities in Company X", resulting in PPT presentation and 1-page Executive Summary, with appendices (short company interview transcripts).	82	44
TOTAL:	124	100

### (1) IN-CLASS TESTS

These 15-minute tests will consist of ten true / false multiple-choice questions, plus one very short free answer question (grade weight: 8% per test, total 56% for all seven tests).

Each short test will cover the previous session's material, correspondingly (i.e., the first test will be administered at the beginning of Class 2 and will cover Class 1 material, while the last test will be administered at the beginning of Class 8 and will cover Class 7 material). All test questions will be based on the ideas discussed in class (course literature serving as a background).

### (2) TEAM PROJECT: "IMPROVING CUSTOMER VALUE ANALYTICS CAPABILITIES IN COMPANY X"

From the first day on students will work in teams of 3 to 4 people on a short team project "Improving Customer Value Analytics Capabilities in Company X". Each team will have to select a real company for their analysis. Teams will be formed during the first class. The instructor will provide guidelines for company selection, and discuss data gathering format (it is suggested that each team interviews company representatives). During Class 9, each team will deliver a short PPT presentation showcasing the results of this project, which the other teams will discuss. By the end of the course, each team will also have to prepare a 1-page Executive Summary and submit their interview transcripts.

### RETAKE

In case of unsatisfactory test grades, or in case of missed test, students will be allowed to make them up by writing learning reflections for the corresponding class (further information will be provided during Class 1).

Team project and group presentation cannot be rewritten but their evaluation is not annulled.

### REQUIRED READINGS

Required text excerpts from the following (as well as some other) sources will be provided in PDF form:

Instructor may assign additional articles, publications, interviews and studies published by top scholarly and practitioner journals.

### TEACHING METHODS

1. The course will consist of nine 180 minute (4-academic-hour) blocks, as per detailed timetable, taken up by lectures, discussions, quizzes, team presentations and guest visits.
2. Lectures will focus on conceptual and theoretical issues blended with examples and illustrations from actual business cases. Majority of meetings will follow an interactive format. Consequently, attendance and participation (questions/ comments/ criticisms) in class discussions will be critical to the success of the course.
3. The course is interactive and requires high level of involvement from the students during the class sessions. Students are expected to come to class well prepared. Unless otherwise noted, it is important to read the articles and /or cases before coming to class.

### ADDITIONAL REMARKS

1. Proper classroom etiquette is expected at all times.
2. The class notes (slides) are the intellectual property of teaching instructor. Students may not distribute or duplicate these notes without instructor's written consent.
3. Any single assignment not completed will be assigned a grade of "0".
4. All assignments must be completed on time. No postponement and/or retake of the assigned tasks shall be allowed.
5. Failing grades from quizzes and team presentations shall not be calculated and will equal '0'.
