

# INTERNSHIP CALL FOR RESEARCH ASSISTANTS

Visionary Analytics values its interns and treats them as **potential future employees**.  
Thus offers:

- Opportunity to contribute to research, policy analysis and evaluations at **EU levels** via working with EU entities such as European Commission;
- Exciting, demanding and highly supportive working environment and colleagues as well as **mentors**;
- Professional growth within the team of qualified experts through working on **topics from AI to social justice**;
- Variable length of internship – 3 months or longer and ability to **combine the internship with studies** as well as, **have the internship remotely**.

We are looking for:

- A student who has finished (is about to finish) BA studies and has started MA or PhD in Social Sciences;
- A student who has experience in academic writing (university papers, research experience, etc.);
- A student who would speak and write in fluent English (C1-C2 level);
- A teammate who relates with [our values](#) and feels responsible for his/her input and work.

Key responsibilities:

- Quantitative (surveys, statistics, etc.) and qualitative (desk research, interviews, etc.) data collection;
- Contribution to data analysis and generation of findings;
- Contribution to the development of reports and other documents in English.

If you are interested in the internship, please send us **a few paragraphs of your motivation** and an **up-to-date CV with a recent paper** which you prepared during your studies or applied research work to [talents@visionary.lt](mailto:talents@visionary.lt)

**Strong applicants may be eligible for a scholarship.**

Preference will be given to candidates with a proven interest and experience in **policy analysis** as well as, knowledge of **other European languages**.  
Recommendation(s) from previous/ recent academic advisors are desired.

**The application is open till 2022/03/01.**

## About Visionary Analytics

Science and research

Visionary Analytics (VA) is research-based policy advisory, specialising in education and innovation policy areas. It develops new tools and applies solid methods to provide tailored advice for the EU institutions and national governments.

VA services focus across three domains: education, innovation and methods.

Education policy is key area of our services which mainly focus on vocational education and training, higher education and adult learning.

In line with our expertise in supporting innovation policy, we provide services in the following broadly defined thematic areas: innovation policy and instruments; innovation governance; innovation systems; and RTDI strategies for organisations and sectors.

VA expertise covers the following methods: impact assessment, policy evaluation (ex ante, interim and ex post), applied research and studies and foresight analysis.
